SKU	Designation	French Law	Caliber	Projectile	Weight (g)	Pack.	Colors	MSRP
BB2025	0.20g - trace BIO green BLS - 1kg bag	Vente libre	6 mm airsoft	BBs airsoft	0.2	5000	Green	33.00 € incl. tax
BB2026	0.25g - trace BIO green BLS - 1kg bag	Vente libre	6 mm airsoft	BBs airsoft	0.25	4000	Green	34.00 € incl. tax
BB2027	0.28g - trace BIO green BLS - 1kg bag	Vente libre	6 mm airsoft	BBs airsoft	0.28	3571	Green	36.00 € incl. tax
BB2030	0.30g - trace BIO green BLS - 1kg bag	Vente libre	6 mm airsoft	BBs airsoft	0.3	3333	Green	39.00 € incl. tax
BB2031	0.32g - trace BIO green BLS - 1kg bag	Vente libre	6 mm airsoft	BBs airsoft	0.32	3125	Green	41.00 € incl. tax
BB2028	0.30g - tracer BIO green BLS - bag 2000 bbs	Vente libre	6 mm airsoft	-	0.3	2000	Green	24.00 € incl. tax
BB2029	0.32g - trace BIO green BLS - bag 2000 bbs	Vente libre	6 mm airsoft	-	0.32	2000	Green	26.00 € incl. tax
PCKBB2025	0.20g - tracer BIO green BLS - carton of 20 x 1kg bags	Vente libre	6 mm airsoft	BBs airsoft	0.2	100000	Green	499.00 € incl. tax
PCKBB2026	0.25g - Tracer BIO green BLS - carton of 20 x 1kg bags	Vente libre	6 mm airsoft	BBs airsoft	0.25	80000	Green	549.00 € incl. tax
PCKBB2027	0.28g - Tracer BIO Green BLS - Carton of 20 x 1kg bags	Vente libre	6 mm airsoft	BBs airsoft	0.28	71428	Green	599.00 € incl. tax
PCKBB2030	0.30g - Tracer BIO green BLS - carton of 20 x 1kg bags	Vente libre	6 mm airsoft	BBs airsoft	0.3	66666	Green	599.00 € incl. tax
PCKBB2031	0.32g - tracer BIO green BLS - carton of 20 x 1kg bags	Vente libre	6 mm airsoft	BBs airsoft	0.32	62500	Green	609.00 € incl. tax

SKU	Designation	French Law	Caliber	Projectile	Weight (g)	Pack.	Colors	MSRP
PCKBB2028	0.30g - trace BIO green BLS - carton of 30 sachets of 2000 bbs	Vente libre	6 mm airsoft	-	0.3	60000	Green	579.00 € incl. tax
PCKBB2029	0.32g - trace BIO green BLS - carton of 30 sachets of 2000 bbs	Vente libre	6 mm airsoft	-	0.32	60000	Green	629.00 € incl. tax

High-precision BIO tracer pellets to track your shots during airsoft games.

BLS Precision 6mm BIO tracing beads combine **biodegradable PLA** construction with excellent dimensional consistency of **5.95mm ± 0.01mm** . Available in **0.20g, 0.25g, 0.28g, 0.30g, and 0.32g** , they allow for trajectory visualization with a compatible tracing device. Packaged in **1kg resealable bags** , they are also available in cartons of 20 bags.

- **Brand:** BLS Precision
- **Type:** BIO tracer airsoft BBs
- **Caliber:** 6 mm Airsoft
- **Outer diameter:** 5.95 mm
- **Dimensional tolerance:** ± 0.01 mm
- **Available weights:** 0.20 g, 0.25 g, 0.28 g, 0.30 g and 0.32 g
- **Material:** Biodegradable PLA
- **Color:** white (color indicated in the description)
- **plot function:** yes
- **Indicated tracing color:** green
- **Unit packaging:** 1 kg bag
- **Cardboard packaging:** 20 bags of 1 kg
- **BB2028, BB2029, PCKBB2028 and PCKBB2029:** these are bags of 2000 marbles
- **Quantity per carton:** 20 kg
- **Closure:** resealable zip

Bio-based tracking beads to follow trajectories

BLS Precision 6mm BIO tracer BBs combine high-precision manufacturing with a luminous function, particularly appreciated during airsoft games in low-light environments. With a **compatible tracer device** , they become visible during their trajectory, allowing the player to better observe the direction of their shots.

This feature is particularly useful for night games, CQB sessions, and training in dimly lit areas. It facilitates aiming corrections and adds an extra visual dimension to the game.

Made from biodegradable PLA

These BBs are made of **biodegradable PLA** , a material used to produce BIO airsoft BBs. They offer an alternative to conventional plastic BBs for players and fields that prefer this type of consumable.

However, biodegradability does not mean immediate decomposition in nature. The rate of degradation depends in particular on environmental conditions.

A diameter of 5.95 mm for greater consistency

With a **diameter of 5.95 mm** and a **tolerance of ± 0.01 mm** , the balls benefit from excellent dimensional consistency. This precision contributes to a uniform feed and limits variations related to projectile dimensions.

An important advantage for players seeking consistent operation, especially with replicas equipped with **precision barrels** .

Five weights to adapt the replica's behavior

The range is offered in **0.20g, 0.25g, 0.28g, 0.30g and 0.32g** , allowing you to choose the weight best suited to the power of the replica and the playing conditions.

- **0.20 g:** a light weight commonly used on moderately powered replicas.
- **0.25g:** a versatile choice offering a compromise between speed and stability.
- **0.28 g:** an intermediate weight appreciated for its increased resistance to external disturbances.
- **0.30 g:** a weight suitable for configurations capable of efficiently propelling heavier balls.
- **0.32 g:** the highest weight in this selection, intended for replicas with a suitable hop-up.

The choice of weight depends on the technical characteristics of the replica and the power limits applied in the field.

A 1 kg bag with a zip closure

Each weight is packaged in a **1 kg bag** , equipped with a **quick-release zip closure** . This packaging allows for easy resealing of the bag after use and protects the beads from dust during storage.

A **carton of 20 bags of 1 kg** is also offered, i.e. **20 kg of pellets** , to meet the needs of professionals, associations and airsoft fields.

Attention: the references BB2028, BB2029, PCKBB2028 and PCKBB2029 are not 1kg bags but bags of 2000 marbles.

Approximate number of marbles per bag

For a bag containing 1 kg net of marbles, the theoretical quantities vary according to the weight:

- **0.20 g:** approximately 5,000 marbles
- **0.25 g:** approximately 4,000 marbles
- **0.28 g:** approximately 3,571 marbles
- **0.30 g:** approximately 3,333 marbles
- **0.32 g:** approximately 3,125 marbles

FAQ

Do BLS Precision BIO tracer beads require a tracer?

Yes. A compatible airsoft tracer device is required to activate the light effect of the BBs and visualize their trajectory in dimly lit environments.

Are BLS Precision tracer balls biodegradable?

Yes. This range is made from biodegradable PLA. The material's degradation depends on environmental conditions and is not instantaneous.

What packaging options are available?

The pellets are available in 1 kg resealable bags or in cartons of 20 x 1 kg bags, for a total of 20 kg. Five weights are available, from 0.20 to 0.32 g.
