The essential Ultrair gas now in high power for winter games

High-performance gas , formulated to maintain the performance and autonomy of your airsoft guns in low temperatures. High-pressure gas, 178 psi. Not recommended for use in pistols with plastic slides.

This 178 psi Ultrair Airsoft Power Gas Red ***** is a high-performance gas, formulated to maintain the performance and autonomy of your replicas when temperatures are low.

Tested at a base temperature of 25°C

Using this gas in a pistol with a plastic slide is not recommended, as the pressure at room temperature is higher than its design pressure. To help you choose the right gas for your firearm, this product has also been tested at 5°C, 10°C, 15°C, 20°C, and 30°C, as shown in the handy temperature and pressure range chart on the back of the canister.

***Tested at 25°C/77°F**

Features:

- 570 ml bottle
- High-power gas 178 psi*
- Recommended for winter use
- Durable metal nozzle

Remember to use your equipment responsibly and be mindful of the limitations of your weapons and magazines. To help you choose the right gas for your equipment, this gas has been tested over a wider temperature range, as shown in the handy temperature and pressure range chart on the back of the product.
