Hyper realistic airsoft replica of the weapon used by Russian infantrymen and snipers in the 2 World Wars.

Inspired by the legendary Russian rifle, this Double Bell bolt-action replica offers remarkable realism thanks to its ejectable cartridge system and its carefully reproduced wood/metal construction.

- **Spring-loaded operation** with authentic locking action
- **Actual ejection of 7.62x54 R type cases** (1 ball per cartridge)
- **Wooden stock and forend** for a natural grip
- **Metal barrel and external parts** for improved rigidity
- **Adjustable hop-up** to optimize trajectory according to distance
- **4-cartridge capacity** for ultra-realistic reloading
- **Total length: 1240 mm**
- **Disassembly of the charger** is identical to the original system
- **24x193 mm steel cylinder** and robust metal trigger block
- **Long internal barrel (640 mm type)** offering consistency and precision

This replica of the Mosin Nagant with ejectable cartridges is aimed at enthusiasts of pure realism, both gamers and collectors. Its wood and metal construction, combined with the manual bolt action, provides immediate immersion.

It combines tradition, authenticity and consistent performance for outdoor games.

Robust construction and historical details

The natural wood provides an authentic feel, with a clearly visible grain reminiscent of period firearms. Metal components reinforce the structure and enhance durability, while offering inertia consistent with the spirit of the original Mosin-Nagant. Adjustable sights allow for fine-tuning the aim to suit the terrain.

Realistic bolt-action mechanism with ejectable cartridges

Each shot requires manipulating the bolt, which inserts and then ejects a spent cartridge. This mechanism provides a unique feel, ideal for reenactments or for players seeking authentic operation. The long inner barrel ensures a stable trajectory and excellent firing consistency, offering effective range at typical outdoor scenario distances.

Comfort, ergonomics and field use

The stock offers a comfortable grip, even during extended sessions. The overall build quality exudes solidity and inspires immediate confidence. Thanks to the adjustable hop-up, the user can adapt the trajectory to the BB weight or weather conditions, for precise and intuitive tuning.

FAQ

Does the replica use functional casings?
Yes, each shot introduces and ejects a cartridge case designed to hold a ball, reproducing the historical operation of the rifle.

Is the stock made of real wood?
Yes, the stock, the barrel and the handguard are made of natural wood to enhance visual and tactile authenticity.

Is the hop-up adjustable?
Yes, it is fully adjustable to optimize accuracy depending on the distance or weight of the balls.

Can a scope be installed like on sniper rifle models?
It is possible to use a suitable mounting, depending on the compatible options, to draw inspiration from historical versions equipped with optics.

Is the replica suitable for immersive or historical games?
Yes, it is particularly appreciated in milsim, reenactments or narrative scenarios thanks to its high level of realism.
