A69480	Mosfet PICO SSR3 - GATE	Vente libre	23.00 € incl. tax

PicoSSR 3 is the smallest MOSFET for AEG in the market

Although its dimensions are only 4x6x21 mm, PicoSSR 3 is very powerful. It has wonderful electrical and mechanical characteristics and it fits replicas with little space for a MOSFET.

In addition, it is fully resistant to immersion in water (after the heat shrink sleeve is put). It can work with the most powerful AEGs - the maximum rated battery voltage is 12.8 V.

Delivered with :

- PicoSSR 3
- Single signal lead wires for trigger contacts, 60 cm long each (2 pcs.)
- Heat-shrink sleeves (3 pcs.)

FUNCTIONS:

MOSFET

Want to get a better rate of fire and a faster reaction of the trigger? Do you plan to increase the power of your rifle? In this case, you need a MOSFET.

It directs the energy of the battery directly to the motor, neutralizing the mechanical contacts of the trigger. As a result, you will get a better shot rate from the rifle and a faster trigger reaction, and the contacts will be protected against burns.

Made in Europe, 12 months warranty
