Cynetic shock-resistant rubber balls for Walther T4E type 50 revolver

High quality balls for maximum efficiency manufactured by Concorde Defender and compatible with Walther T4E type 50 caliber weapons.

Solid rubber balls deform slightly on impact to transfer maximum cynetic energy to the target. The neutralizing effect will be all the more important as the energy (in joules) of the weapon will be high. In the range of revolver Umarex T4E you have the choice between a version 7 joules and a version 11 joules (which we recommend for the defense).

- Caliber: .50.
- Projectile: full rubber ball
- Weight of one ball: 1.05 g.
