BBR95	Box of 50 rubber metal balls	Vente libre	.50 Air	50	2.5	19.00 € incl. tax

Extra-heavy rubber and metal balls with reinforced kinetic shock effect for Walther T4E type 50-caliber revolver.

High quality balls for maximum efficiency and compatible with Walther T4E type 50 caliber weapons.

The rubber and metal balls transfer even more kinetic energy to the impact thanks to their greater mass. They consist of a homogeneous blend of rubber and ultra-fine metal powder that significantly increases the density of the beads.

The neutralizing effect will be all the more important as the energy (in joules) of the weapon will be high. In the range of revolver Umarex T4E you have the choice between a version 7 joules and a version 11 joules (which we recommend for the defense)

- Caliber: .50.
- Projectile: full rubber ball
- Weight of one ball: 2.48 g.

In use at training, possibility of picking up the balls using a magnet.
