Sniper finned and cynetec shock ammunition for Walther T4E type 50 caliber defense revolver

High quality balls for maximum efficiency manufactured by Concorde Defender and compatible with Walther T4E type 50 caliber weapons.

The finned ammunition imparts a gyroscopic rotation effect to the projectile giving it excellent accuracy beyond 5 meters, where the spherical balls begin to deviate from their trajectory.

The neutralizing shock effect will be all the more important as the energy (in joules) of the weapon will be high. In the range of revolver Umarex T4E you have the choice between a version 7 joules and a version 11 joules (which we recommend for the defense).

- Caliber: .50.
- Projectile: solid rubber ball with fins
- Weight of a ball: 0.75 g.
