CDP1140L	Denix Winchester 1866 Rifle Replica	Vente libre	100	3000	277.00 € incl. tax

A reproduction in metal and wood with a simulated lever-operated cocking mechanism.

The **DENIX replica of the Winchester USA 1866 rifle** combines a metal frame with wooden elements to recreate the look of the famous model nicknamed "Yellow Boy." Measuring 100 cm long and weighing 3 kg, it features a moving mechanism that simulates loading and firing via a lever action. This replica does not fire ammunition and is intended for collecting, decoration, or historical reenactment. The simulated operation allows users to experience the main mechanical actions of the period model without having a working firearm. Inspired by the repeating rifle perfected by Nelson King's patent, this **DENIX** piece offers a tangible evocation of the American Western and the history of Winchester firearms.

- **Brand:** DENIX
- **Reproduced model:** Winchester Carbine Mod. 1866
- **Type:** Non-functional reproduction of a historical rifle
- **Origin of the model:** United States, 1866

- **Control:** movable lever
- **Length:** 100 cm
- **Weight:** 3000 g
- **Shooting function:** none, this replica does not fire.
- **Uses:** collection, decoration and historical reenactment

A reproduction of the Winchester 1866

The **DENIX Winchester 1866** replicates the silhouette of the famous American lever-action rifle. The historical model allowed for rapid fire thanks to the lever's movement, which extracted the spent cartridge case and loaded a new one. Nelson King's improved patent marked a significant

evolution compared to the Henry rifle.

A mobile mechanism for reconstitution

This **replica Winchester rifle** features a mechanism that simulates loading, cocking, and firing. The lever movement replicates the characteristic grip of the historical model. The replica is entirely non-functional and cannot fire any ammunition.

A piece made of metal and wood

The combination of **metal** and **wood** evokes the general appearance of 19th-century rifles. Measuring 100 cm in length and weighing 3 kg, this DENIX reproduction can complement a collection, a display dedicated to the conquest of the West, or the equipment of a participant in a historical reenactment.

FAQ

Why was the Winchester 1866 nicknamed "Yellow Boy"?

This nickname came from the yellow tint of the receiver of the historical model, made from a bronze alloy called gunmetal.
