Extra heavy rubber and metal balls with reinforced kinetic impact effect for Walther T4E type pistol

High quality balls for maximum efficiency and compatible with Walther T4E type 43 caliber weapons.

The rubber and metal balls transfer even more kinetic energy to the impact thanks to their greater mass. They consist of a homogeneous blend of rubber and ultra-fine metal powder that significantly increases the density of the beads.

The neutralizing effect will be all the more important as the energy (in joules) of the weapon will be high.

- Caliber: .43 full rubber ball & steel powder
- Weight of a marble: 1.6 g.

In use at training, possibility of picking up the balls using a magnet.
