A 10-shot PCP tactical set complete with rifle, bezel, muffler and bipod.

The PCP air rifle allows for the firing of 60 shots at 40 joules with one air reload. This configuration, combined with a scope and bipod, ensures accurate shots from a prone position or resting on a table. The sound moderator makes the shots particularly discreet.

- Pistol stock, adjustable comb and rubber butt plate
- 10-round magazine and air tank with pressure gauge
- Gamo 6-24 x 50 silencer and scope on 11mm rail
- HPA system

Comes with: A 200 bar air hand pump and a hose for recharging on a diving cylinder.

The HPA system is a set of valves that will allow to always have the same outflow of air from the shots.

This generates equal pressure on the volume of air displaced so that the power will always remain constant.

Out of this constant pressure, weights will also be constant and generate a rare gain in precision on high power models.

- 1/2x20 UNF Thread
- Fits .22 lr suppressor
