For Tokyo Marui NGRS rifles only

The best option if you have already purchased TITAN Complete Set (the entire kit) but you would like to have TITAN in multiple replicas. In this case you do not need another Tactical Programming Box and another USB-Link of the entire kit. This option is also suitable for you if you want to have the TITAN installed and configured by the airsoft services and you do not want to change the settings.

Included in the kit:

TITAN Drop-in module (front or rear wiring)
Mounting kit
Portable instruction manual

Attention: In order to start and configure TITAN Module Drop-in, the Tactical Programming Box or USB-Link are **essential** .

Very important :

To run and configure the TITAN, it is necessary to have the USB link

Why is the GATE TITAN so special?

- November 2023 Update: New firmware including Expert mode
- It has simplified configuration via the GATE Control Station app for Android, Windows and macOS
- It is the first and only mosfet allowing firmware updates via the internet, which allows improvements
- It has a relaxation sensor which even offers you 250 possible adjustment parameters

- It has innovative optical sensors instead of mechanical contactors which can present faults
- It gives you access to statistics and rankings (in case of advanced firmware)
- It has a reactivity/trigger response identical to a real weapon
- It is compatible with DSG, SSG and 19 tooth pistons
- It is compatible with most Gearbox V2 (including CNC) on the market without any modification
- It is compatible with the most powerful AEG replicas.

GATE Control Station™

TITAN and GATE Control Station give you full control of your AEG. The GCS offers you the option to:

- Control your replica from your smartphone with Android and PC, with Windows or macOS
- Just adjust the TITAN settings
- Simplicity for updates
- View statistics and participate in rankings*
- Perform diagnostics and send reports

* only in case of advanced firmware
