LMP1019 multicolored LED torch supplied with 1 end cap with remote switch, 1 end cap with tactical switch, 1 rechargeable 26650 4000 mAh 3.7 V battery, 1 battery charger on Micro USB, 1 wrist strap and 1 user guide.

Care :

Blow gently to remove any dust or debris from the lens (or use a soft lens brush). To remove dirt or fingerprints, clean with a soft cotton cloth in circular motions. Using a rough cloth or rubbing the lens unnecessarily can scratch it and cause irreversible damage, if necessary. For more thorough cleaning, use a special lens wipe and a photographic lens cleaning liquid, or isopropyl alcohol. Always apply the liquid on the cloth and never directly on the lens. Cleaning the contacts of your flashlight from time to time improves the performance of the lamp. Dirty contacts can cause the flashlight to flicker, light intermittently, or not light at all. Every 6 months, clean the threads of the battery compartment cover and the flashlight tube with a dry cloth, then apply a thin layer of silicone lubricant to the rubber O-ring. Never remove the lens head or any of the internal components. You could damage the flashlight and void your warranty.

Precautions for use:

Fully charge the battery before first use. The LMP1019 multicolor LED flashlight is a high intensity lighting device capable of causing damage to the eyes. Avoid directing light directly into someone's eyes. The operating time of your flashlight depends on whether it is used continuously or intermittently. Intermittent

operation can extend the battery life. LED is a light source that will work for the life of the lamp. It will never be necessary to replace it. Remove the battery when you are not using the lamp for an extended period of time. As the LMP1019 multicolored LED flashlight is a lamp with high light intensity, it can reach high temperatures. It is normal for the aluminum body of the lamp to become very hot during continuous use. Keep it away from children. Handle it with care.
