Full metal replica of the P38 with fixed hop-up and 15-round magazine.

Black version of the **GALAXY G21 P38** , this **metal** spring replica combines retro look and reliable performance for recreational shooting or historical airsoft.

- **Caliber:** 6 mm BB
- **System:** Spring (manual)
- **Capacity:** 15 marbles
- **Power:** ~0.5 joules
- **Hop-up:** Fixed
- **Color:** Black
- **Materials:** Metal

A simple and effective version of the legendary P38

This **black Galaxy P38** model faithfully reproduces the lines of the famous **Walther P38** , an iconic weapon of World War II. Its matte black finish gives it a sober look that will enhance immersion during your historical themed games or target shooting sessions.

Full metal and realistic feel

With its **metal construction** , the P38 metal spring offers a good weight and a firm feel when handling. This choice of material also extends its **lifespan** under heavy use.

Reliable and secure airsoft performance

Powered by a simple spring system, this replica delivers approximately **0.5 joules** of power (around 290 FPS), sufficient for **accurate shooting** in indoor or semi-open environments. The **fixed hop-up** improves trajectory without requiring complex adjustments.

15-round magazine for smooth gameplay

With its **15-round capacity** , this replica offers a good compromise between compactness and firing autonomy, eliminating the need for constant reloading. The **single-shot mode** with a safety feature ensures controlled operation, making it ideal for beginners.

Secondary specifications

- **Blowback:** No
- **Firing mode:** Single shot / Safe

- **Recommended beads:** 0.12 g or 0.15 g
- **Finish:** Matte black

FAQ

Is the charger larger than the silver version?

Yes, this version has a 15-round magazine compared to 10 for the other version, offering more autonomy.

Is this model reliable for frequent use?

Yes, its full metal construction and simple spring system make it a durable and reliable choice for regular users.

Which ball bearings should be used for optimal accuracy?

0.12g BBs offer decent range, but for more stability, 0.15g BBs are also recommended.
