### Compact, robust and high-precision thermal monocular.

The NUM'AXES Vis1053 is a **digital thermal imaging** monocular designed for demanding users. Compact, waterproof, and equipped with a high-resolution sensor, it offers a range of up to 450 meters for nighttime observation.

- **Thermal sensor:** 240 x 180 pixels
- **LCD screen:** 240 x 240 pixels
- **Range:** up to 450 m
- **Magnification:** 1x to 4x digital
- **Waterproof rating:** IP66
- **Battery life:** 6 hours
- **Weight with batteries:** 274 g

### Digital thermal technology for seeing in the dark

The Vis1053 can detect heat sources, even in total darkness. It offers a **detection range of up to 450 m** thanks to its 240 x 180 pixel thermal sensor and integrated **LCD screen**. **Color palettes** allow you to adapt the image display to the terrain or objective (animal tracking, presence detection, etc.).

### Progressive digital zoom 1x to 4x

Thanks to its **variable digital zoom**, this monocular adapts to the observation distance. You can start with a wide field of view to scan an area, then zoom in gradually to identify a heat source with greater precision. This silent zoom maintains good readability and allows for a **discreet approach**.

- **Field of view:** 23.4° x 17.5°
- **Focal length:** 10 mm

- **Lens:** 50 mm diameter

### **IP66 waterproofing and long battery life**

The **NUM'AXES Vis1053** is protected against powerful water jets and dust ( **IP66 rating** ), making it a reliable companion for extended expeditions or use in the rain. Its battery life reaches **6 hours of continuous use** , enough to cover an entire evening of observation or surveillance without interruption.

- **Power supply:** battery operated
- **Dimensions:** 167 x 45 x 274 mm
- **Weight:** 274 g with batteries

### **FAQ**

#### **Is IP66 waterproofing sufficient in heavy rain?**

Yes, the Vis1053 is resistant to powerful water splashes and dust, even in heavy outdoor use.

#### **Is the zoom optical or digital?**

This is an adjustable digital zoom from 1x to 4x, ideal for modulating remote observation.

#### **What type of batteries does the device use?**

The Vis1053 operates on standard batteries, offering up to 6 hours of continuous battery life.
