PRODUCTION HISTORY

Designer: Mikhail Kalashnikov
 Origin: Soviet Union
 Development: 1944-1948
 Manufacture: 1948-Present
 Production: 1,000,000+

SPECIFICATIONS

Action: Gas-Operated Rotating Bolt
 Feed System: 30 Bolt Detachable Box Magazine
 Chamber: 7.62×39mm
 Diameter: 32.04 mm (1.261 in)
 Length: 870 mm (34.25 in)
 Sight: Adjustable Iron Sights
 Rate of Fire: 600 rounds/min
 Magazine Capacity: 30 rounds

OVERVIEW

The AK-47 is a 7.62 mm assault rifle developed in the Soviet Union by Mikhail Kalashnikov in two versions, the base design AK-47 and the AKS-47 variant equipped with an under-barrel metal folding stock.

Design work on the AK began in 1944. In 1946 the rifle was presented for official military tests, and a few later the first stock version was introduced and fully approved with minor improvements. The folding stock model was developed later. The AK-47 was officially accepted by the Soviet Army in 1949. It was selected by the majority of the member states of the former Warsaw Pact. The AK-47 was also used as a base for the development of many other types of individual and crew-served weapons.

DISASSEMBLY

Disassembling the rifle involves the operator depressing the magazine catch and depressing the magazine. The charging handle is pulled to the rear and the operator pushes the chamber to the rear of the receiver while simultaneously tilting up the rear of the cover to remove it. The operator then pushes the spring assembly forward and lifts it from its recesses and depresses it at the top of the barrel and to the rear. The operator then turns the cover assembly at the top to the rear, lifts it and then pulls it down. This operation removes the bolt by pushing it to the rear of the bolt carrier. Pushing the bolt to the rear compresses the springs on the underside of the bolt carrier and the bolts, forward and back, then depresses the magazine and only manual operation in the middle and back to that extent. All gun parts have been produced that all other assault rifles contained.

SKU	Designation	French Law	MSRP
A60717	Viper Gun Cleaning Mat - AK47	Vente libre	24.00 € incl. tax

Absorbent mat for carrying out maintenance and repair of airsoft replicas, airgun pellet rifles, firearms. Its foamed texture makes it possible to absorb light shocks and to work in the best conditions.
 The AK47 print on this carpet traces the history of this weapon, its diagram and its maintenance instructions.

- Dimensions: 89x29cm
- Thickness: 3mm
- Materials: 3mm thick neoprene foam and polyester printed on the top.
