A61052	HPA SDIK ARES Conversion Kit	Vente libre	204.00 € incl. tax

To convert an ARES STD, MSR, LSR or WA2000 spring airsoft sniper rifle to HPA

SDIK - Sniper Drop in Kit - a set of components which allows converting a spring rifle into gas-powered rifle. It is cheap and very effective method to upgrade.

The entire structure was designed from the ground up - as evidenced by the patent issued. The Conversion Kit is based on a simple and effective system of gas supply that is reliable and durable.

With proper construction and materials, the mechanism does not burden other components of a gun - they may be standard (e.g., the trigger assembly, cylinder etc). Rifle can be reloaded with one finger - overcharging is very smooth.

By using an appropriate regulator it is possible to obtain very stable (+/-3fps), satisfactory fps.

In some rifles assembly may require modification of the body/parts.

- Compatibility: Ares MSR, MCM, LSR et WA2000
- Materials: Alimuminium
- HPA connector: 4mm hose

Included: SDIK HPA system, 4mm HPA hose (1.30m)
