The DEFENDER PRO has an entirely new slide featuring 3 forward vent ports, a top slide ripple pattern and rippled slide grips. The design of the vent ports has been incorporated into a new “twist and click” moderator that is very easy to remove. Included is a spare barrel bushing if it is the non-moderated look that is required. The pistol grips are a split wood/polymer construction, this leads to a striking design. Finally, a solid trigger is being used for the first time on a VORSK model.
