Available in 8 colors

Airsoft magazine for M4 replicas with a capacity of 130 rounds.

A high performance spring ensures an ideal ball lift for very high rate of fire (rof) replicas, such as HPA and Hi-speed replicas.

This charger is equipped with an original rubber pull tab and has a place to note the charger window number.

A transparent window makes it possible to visualize the balls inside the magazine.

The shell of the Lancer Tactical Speed loader is made of high density polymer. Its textured shell allows a foolproof grip and increased resistance to shocks (the charger is strong enough to fall to the ground repeatedly)

- Can feed BBs consistently, even in HPA guns with high rate of fire

- Transparent window reveals the remaining BB count
- Impact-resistant polymer construction with rugged surface texturing
- Compatible with Lancer Tactical Proline Series as well as most M4 airsoft AEGs
- 3 digital number at the bottom of both sides to allow easy marking for identification
- Removable magazine baseplate for easy quickdraws
