### A white light and infrared combo

- White light output: 400 Lumens
- Beam power: 4000 Candela
- Infrared light power: 100 mW
- Lighting distance: 126 meters
- Waterproof up to 20 meters
- Autonomy white light: 1 hour 30
- Infrared light autonomy: 4 hours 00
- 123A battery supplied
- Nylon reinforced fiberglass construction
- Locking by lever and rotation of the head
- 21mm Picatinny Rail Mount 1913
- Multiple operating modes: Constant / Momentary / Strobe
- Colours: Black or FDE

The WML is a tactical and compact flashlight which, thanks to its integrated picatinny rail, can be fixed directly on the rail of its AR15 or any long gun equipped with a MILSTD 1913 21 mm picatinny rail.

It combines both a white light visible to the naked eye but also an IR function, with an infrared light visible only through night vision binoculars.

Its rear switch positioned at 45° makes its use simple and natural because the reactive hand holding the hand guard instinctively comes to rest on the lamp contactor.

Its compact side and skimming the rail, allows the WML to be placed on any side of its handguard, without it obstructing the field of vision or even the aiming.

Proven in shooting, it will resist all calibers as well as the most difficult conditions.

A simple adjustment allows you to opt for a continuous light after activation or a momentary light requiring continuous support or a strobe mode.
