While stocks last.

The world's first custom P226 airsoft line

Equipped with a frame-mounted Breacher that extends both the pistol and barrel length, the VP26X's side profile is unlike any other GBB pistol on the market.

The slide has undergone some weight reduction with the addition of three dual-vented openings to the front as well as deep engravings on the rear slide grips, a common feature on VORSK GBB pistols.

This lightened slide improves the recoil effect, but this sensation is further enhanced with the adjustment of the Breacher (barrel extension).

While most GBB pistols rely entirely on the locking pin to stop the forward momentum of the slide, the Breacher VP26X provides a second point of contact that really amplifies that recoil feel.

Vorsk replicas are inspired by the finest and most advanced modern combat and competition weapon designs.

VORSK translates these unique and innovative concepts to the airsoft market in the form of an all-new line of GBB pistols.

VORSK's goal from initial concept to market was to provide rugged, reliable GBB pistols while adding a touch of style and flair to your handgun.

To achieve this, VORSK took the time and care to discuss and develop these concepts with key airsoft players. These concepts then went through extensive development, with new molds and production techniques ensuring a first-class product range.

The VORSK styling is also found on the custom hammer, as well as the polymer grip. The 21-round magazine is equipped with a polymer plate to protect the metal magazine body. The VP26X also features a De-Cocking lever so you can safely return the hammer to its safe position without discharging. Sight options include either fiber optic metal sights or Dot-Sight options - Black, Grey or Tan.

The product also comes with a 12mm CW / 14mm CCW adapter. The double action chamfered trigger is exceptionally ergonomic and capable of both cocking this replica hammer and firing a BB in a single, long pull.

- CNC monobloc metal cylinder head
- High-adhesion polymer grip
- Metal frame
- External metal barrel
- Fixed fiber optic riser
- Inner barrel: $\varnothing 6.03 \times 93.7 \text{mm}$
- Reinforced nozzle
- 21-ball gas magazine
- Weight: 900 grams
- Firing mode: Semi-auto
- De-cocking function
- Bolt
- Recommended gas: Nuprol 2.0 (A69912) / Nuprol 3.0 (A69917)
- Box contents: 1 replica, 1 21-ball gas magazine, 1 spare parts kit (seals, nozzle), 1 12mm to 14mm adapter, 1 Allen key to adjust the Breacher, instructions, 1 Vorsk patch.

Gas and Co2 compatible
