- **Adjustment:** Windage and elevation (1 MOA per click)
- **Lens:** Anti-scratch and anti-reflective coating
- **Power supply:** CR2032 battery
- **Accessories:** High mount, rubber lens covers

A red dot sight designed for airsoft

The **Lancer Tactical Red Dot Micro** provides rapid target acquisition while maintaining a small footprint. Its compact size integrates perfectly on an **airsoft** replica, whether it's an AR15, AK, MP5 platform or a modern PCC equipped with a **Picatinny rail**.

High mount for comfortable aiming

The **high mount** that comes standard naturally improves the aiming position and makes it easier to use with a protective mask. This height is particularly appreciated in **airsoft** games, where it provides a faster and more comfortable target acquisition.

Three reticles and eleven brightness levels

This **red dot** sight offers a choice of three reticles: **dot** , **crosshair** , or **circle with dot** . **Eleven brightness levels** ensure excellent visibility both indoors and outdoors, regardless of lighting conditions. Windage and elevation adjustments are precise to **1 MOA per click** .

A robust design

The **aluminum alloy** housing is shock-resistant and withstands the stresses of regular use. Its body is **nitrogen-purged** to minimize fogging, while the lens features an **anti-scratch** and **anti-reflective** coating for a clear and comfortable image. Rubber lens covers effectively protect the optics during transport.

FAQ

Is this red dot sight suitable for all airsoft replicas?

Yes, it mounts on a Picatinny rail and is suitable for most long replicas equipped with this standard.

What reticles are available?

You can select a dot, a cross, or a circle with a dot according to your aiming preferences.

Is the viewfinder fog-resistant?

Yes, the camera body is nitrogen-purged to limit fogging and ensure a clear image in various weather conditions.
