The benchmark for upgrading your AEGs

The TITAN is designed for replicas equipped with a V2 gearbox such as M4, M16, AR15, T3, ...

This Mosfet uses optical sensors thus replacing the switches. This is a "drop-in" mosfet supplied with wiring and all the elements necessary for assembly. By using this system, you have access to twenty different functionalities. This technology gives you the option to configure the TITAN in the field using the programming card or simply using USB-Link and the GATE Control Station computer application.

Features:

- Trigger Sensitivity
- Pre-arm mode
- Fire selector mode
- burst mode
- Rate of fire
- Low battery warnings
- Battery protection Delays between shots (sniper delay)

Contents of the box:

- TITAN V2 with EXPERT firmware programming edition
- Blu-Link for GATE Control Station App
- Installation kit
