Micro-compact format, maximum performance

Despite its compact size, the **P365** delivers a **consistent 1.14 J of power** thanks to its CO2 propulsion system. The blowback system provides a satisfying recoil with each shot, and the slide locks when the magazine is empty for added realism. Its small size makes it an ideal secondary weapon or a discreet training tool.

Modern ergonomics and complete safety

The pistol features an **ambidextrous manual safety** , a **functional slide stop** , and a **Sig rail** for attaching accessories. The non-slip grip ensures a secure hold despite its compact size, and the

fixed three-dot sight allows for accurate shooting at close range.

Realistic construction and holster compatibility

The 1:1 scale ensures **compatibility with real holsters** . The metal magazine holds the 12g CO2 cartridge and 12 BBs. The hybrid **metal slide/polymer body** construction guarantees high durability while maintaining a low weight.
