- Extended beaver tail
- Staff in trapezium design
- Picatinny rail for lamp or laser
- Polymer frame
- Metal slide
- Trigger safety
- Textured grip
- Interchangeable backrests
- Compatible with gas or CO2.

History

Considered the next step in Steyr's continued evolution of its line of semi-automatic pistols, the fourth generation real steel Steyr L9-A2 was introduced in 2019 and features a polymer frame and slide made of steel and was designed with the intention of having modular elements.

Industry commentators and consumers alike have praised the pistol's rugged and aggressive appearance that clearly sets it apart from most other handguns on the market today.

The L9-A2 pistol and its two other size variants - M9 (medium) and C9 (compact) will represent Steyr's handgun offering through the late 2020s and beyond.
