- Easy and quick power adjustment
- VSR-10 charger compatibility
- VSR10 compatible hop up joint

11.1V Lipo battery recommended

R-shot system:

STORM AIRSOFT presents its new system for a unique gaming experience.

No more expensive Upgrades to gain performance...

Very efficient out of the box thanks to our manual pneumatic system "R-Shot System" which we have chosen to integrate into a new type of Sniper and "Made in France".

This system consists of no longer having mechanical parts! Each time the sniper is manually armed, a volume of air is compressed in a closed tank.

When firing, an electromagnet releases the air stored in the tank which pushes the ball in a very regular manner giving it performance never seen on an original sniper.

No mechanical noise is audible apart from the air escaping from the muzzle of the barrel, which can completely disappear with the addition of a silencer.

Ultra compact (625 mm without silencer) and very light (1.6 kg), the design of the "R-Shot System" allows the sniper to be very maneuverable while retaining a large internal barrel (460 mm).

We have done everything to satisfy the player by developing a "ready to play out of the box" sniper offering exceptional performance! No modification of parts is necessary, no upgrade is required with this revolutionary new replica!
