A53254	Garrett ACE 300i	Vente libre	1270	LR6 - AA	465.00 € incl. tax

Reference metal detector for enthusiasts! Ideal for searching for treasures and lost coins!

A detection maestro at a great price. The ACE 300i has more modes than an ACE 200i and improved features to help find more treasures.

- Graphic & digital identification
- Target depth display
- Sensitivity adjustable to 8 levels
- Iron discrimination: 4 levels
- Distinction by adjustable range.
- 5 search modes plus location.
- Length adjustable from 1 m to 1.35 m
- Frequency: 8 kHz - adjustable
- Original disc: PROformance DD concentric 18 x 25 cm
- 6.35mm headphone jack
- Audible identification indicator: 3 tones.
- Battery life: 40 hours
- Batteries: 4 x AA 1.5 volts included with wear indicator.
- Delivered with an Easy Stow helmet, a cover for the detector and a disc protector.
- 2-year limited warranty: parts and labor.

The Garrett ACE 300i is an affordable and efficient metal detector. It is part of the new range of Garrett ACE i detectors, which expands the existing range of Garrett ACE detectors. This detector is both user-friendly and effective, suitable for both beginners and detection experts.

The Garrett ACE 300i represents an evolution of the famous leisure metal detector, the Garrett ACE 250, which was already recognized for its qualities. It offers an affordable, user-friendly detection experience, and is equipped with many features, including the pinpointing function, which helps to precisely locate the target on the detection area.

This detector is particularly recommended for beginners who want to get started in metal detecting at an affordable price. It has visual discrimination thanks to its large LCD screen and NOTCH function, as well as audio discrimination with high tones for highly conductive targets, mid tones for medium conductivity targets, and low tones. for normally ferrous targets.

The Garrett ACE 300i offers five pre-programmed detection modes to make it easier to start detection activity:

"Zero-disc" mode: detects all types of metals.
"Jewelry" mode: recommended for jewelry detection, but adaptable to other targets.
"Custom" mode: allows customization according to the types of metals or targets to be discriminated.
"Relics" mode: designed to detect iron relics, with low discrimination.
"Coin" mode: specially designed to detect coins, but can also discriminate certain non-ferrous metals, such as aluminum.

Garrett has improved the ACE line based on user feedback. The Garrett ACE 300i therefore offers two new characteristics compared to the ACE 250:

Target Conductivity Indication: This feature assigns a number from 1 to 100 to help the user identify the likely type of target detected.

New Clamp Rings: Clamp rings have been added to the rod to prevent unwanted movement over time.

Technical characteristics of the Garrett ACE 300i:

- Pinpointing function for precise target location.
- Multi-tone detection with 3 distinct tones.
- Weight: 1.3 kg.
- Power supply: 4 LR6 batteries.
- Autonomy: Up to 40 hours of detection.
- 2 years warranty.

The Garrett ACE 300i comes with Garrett Clear Sound headphones, a disc protector, and a rain cover for the case. It is an ideal choice for those who want to explore the world of metal detecting without investing a considerable amount.
