Mag. Capacity: 180 BB's
Battery: 19365
Standard charger: 19310
Jump type: Adjustable
Speed: 120 ms/393 fps
Weight: 2200gr/4.85lb
Energy: 1.40

Description

The debut of our one-of-a-kind hybrid series, the H-15 Carbine brings the same exceptional performance of the legendary Scorpion EVO to airsoft's most popular platform. Using the same proven internal components in a massive new assault rifle body creates a unique high-performance rifle.

This rifle was built with a mix of metal and polymer components, just like a real assault rifle. This rifle's pistol grip, collapsible stock, and magazine are made of high-strength polymer while every other component, from its rial and barrel to its trigger and frame, is cut from durable metal. Focusing even more on these components, the H-15 includes a range of premium parts, including a HERA ARMS CCS stock, PTS EPG-C pistol grip, and Retro Arms trigger. Additionally, this unique rifle features our own custom ASG M-Rail handguard allowing the user to attach accessories to truly make it their own. The box also includes a midcap magazine with a capacity of 180 rounds.

Focusing on the interior of the rifle, it comes with all of the great internals of the EVO, with some amazing parts of its own. This includes an electronic trigger unit with integrated Mosfet, which allows the user to program the firing modes of the replica. This airsoft rifle has four distinct modes: safe, fully automatic, burst fire and single fire. The ECU also provides cycle detection with pre-arming and intelligent, self-adjusting Active Break. It also includes a quick-change spring guide, accessible via the buffer tube, a T-shaped battery connector and a rotating hop-up unit. These components deliver the proven and beloved performance of the EVO in an all-new stunning AR body, placing the *Hybrid* in H-15. .

This version of the H-15 has "customizers" in mind. Use the smooth handguard to mount all your accessories, the threaded barrel to mount any muzzle device, or use the included flash hider and attach a BET QD to really make it your own.

We are proud to provide the airsoft community with this all new AEG that delivers fantastic performance in a stellar new body and announce the start of our new hybrid series!
