The PTS ZEV Technologies OZ9 Elite GBB pistol is the blowback gas airsoft pistol that faithfully reproduces the appearance and many innovative features of the Zev Technologies OZ9 pistol.

Introducing the PTS ZEV OZ9 Standard, a remarkable airsoft gun that combines reliability and performance with a range of unique features. Designed as an alternative to the Ultra version, the Standard model offers distinct advantages to enhance your airsoft experience. The first notable difference is the material and production method. The Standard version uses sturdy die-cast aluminum alloy construction, ensuring durability without compromising performance. This choice of material provides a solid foundation for the gun, allowing it to withstand the rigors of intense play.

In response to the growing demand for customization options, the PTS ZEV OZ9 Standard outer barrel features an 11mm CW thread, using the 11mm CW to 14mm CCW thread adapter (included), making it compatible with a dummy suppressor and a tracer. This allows you to easily add versatility and an extra touch of realism to your airsoft sessions.

Like the real OZ9, the modular chassis includes the entire firing mechanism and is easily removable from the polymer frame for easy maintenance or modification with a single takedown pin.

To improve user comfort and adaptability, the standard version features an adjustable trigger system. With the ability to choose between long or short travel, you can adjust trigger pressure to suit your shooting style and preferences. This customization option ensures optimal control and responsiveness, improving your overall performance in the field.

Internally, the PTS ZEV OZ9 Standard incorporates several improvements aimed at increasing reliability and power. The piston base has undergone a complete redesign, incorporating state-of-

the-art engineering to minimize the occurrence of BB blockages. The nozzle itself has been significantly enlarged and optimized to provide a smoother trajectory for the pellets, further reducing the chance of disruption during firing. To complement these improvements, a hard and durable nozzle spring has been integrated, ensuring a smooth and consistent pellet feed, shot after shot. These improvements contribute to a more reliable and uninterrupted shooting experience.

Although the standard version offers these unique features, it has many similarities with its ultra counterpart. You can always count on a comfortable grip, ergonomic design and exceptional build quality. Compatibility with various ZEV and TM parts is maintained, opening up a world of customization possibilities based on your preferences.

Whether you're an airsoft enthusiast or a recreational player looking for a reliable handgun, the PTS ZEV OZ9 Standard delivers on all fronts. With its durable construction, use of suppressors and tracers, adjustable trigger, pre-installed PTS Enhanced Pistol Shockplate G-Series, and upgraded internal components, this pistol is a reliable companion for your airsoft adventures.

Features :

- Trademarks licensed to ZEV Technologies.
- Die-cast aluminum alloy slide for a balance of durability and performance.
- The outer barrel of the PTS ZEV OZ9 has an 11mm (CW) thread. Includes thread adapter (11mm CW to 14mm CCW) and thread protector. This allows it to work with mock suppressors and tracers.
- Modular chassis with integrated accessory rail for lamps and lasers.
- Adjustable trigger for long or short stroke at user's choice.
- Redesigned piston base and enlarged nozzle for better ball feeding and reduced jams.
- A hard and durable nozzle spring has been integrated for smooth and reliable cycling.
- Polymer handle with integrated magwell and optimized grip angle for natural aiming.
- Reversible magazine release button for left or right handed shooters.
- Ergonomic trigger for improved engagement and control.
- Modular chassis system easily removable from the polymer frame for maintenance or modification with a single removal pin.
- Extended chassis rails to increase the contact surface between the chassis and the slide, ensuring reliable operation.
- ZEV combat sights with a wide U-shaped rear sight in black steel and a glossy fiber optic front sight.
- Removable RMR mounting plate on the slide for installing an optional red dot sight.
- 6.03mm and 97mm inner barrel combined with 70 degree purple rubber for exceptional accuracy and range.
- PTS Side Arm (SAM) Magazine - GS included, pre-installed with the new PTS Enhanced Pistol Shockplate design to attenuate shock and impact, providing increased durability.

Specifications:

- Black color
- Material: Cast aluminum alloy (slide), reinforced polymer, hard PC
- Reinforced polymer, hard PC
- Finish: black plated
- Outer barrel length: 110mm (approximately)
- Inner barrel length: 97mm (approx.)
- Weight: approximately 830g (without packaging) / approximately 1.2 kg (with packaging)
- Dimensions: 320x185x55mm (packaging)
- Initial velocity: Less than oule (134a) @ 0.2g BB (25?)
- Mag Compatibility: Tokyo Marui
- Magazine capacity: 25 rounds
- Hop-Up: Adjustable
- Hop-Up Rubber: purple - 70 degrees
- Seal: T8 type G-series Gas Route Seal Bucking 60 degree (black rubber)

- Blowback: Yes
- Firing mode: Semi/Safe
- Power Source: Top Gas
