SKU	Designation	French Law	MSRP
PU18444	Block valve TYPE G17 COW COW	Vente libre	35.00 € incl. tax

The High Flow valve blocker is redesigned and adapted to both the TM/WE Hi-capa and G17 series.

It is also the ideal partner for the CCT aluminum valve series.

With the high flow design, the gas flow is smooth and stable against backflow action. 7075 aluminum can increase durability, which prevents bending and warping under heavy use compared to the original plastic one.

Attention and Installation Guide:

Strong screw glue is required for installation. Use a drop of screw glue when installing the screw and wait for it to dry overnight. The screw thread may be damaged if screw glue is not used.

*PS: Please Note: Parts installation/assembly/assembly of airsoft gun will require intermediate knowledge; for expert gunsmith or airsoft. Please refer to your airsoft gunsmith for correct installation/assembly. Adjustment may be necessary as the condition of each airsoft gun may be different.
