Description:

One of the most popular airsoft guns now has a special edition! The CZ Shadow 2 Orange offers the same unparalleled realism and user satisfaction as the original Shadow 2 with additional enhancements to make this airsoft gun a true representative of the quality of its real steel counterpart. The Shadow 2 Orange comes with a fixed stainless steel outer barrel, which greatly increases the stability of the gun while tightening the tolerances of the gun to facilitate more accurate shooting. At the same time, as a fully licensed 1:1 replica, this gun includes an authentic barrel bushing that further increases stability and shooting performance.

Another major improvement over the original is the addition of a stainless steel recoil spring cap which naturally improves the quality of the gun's recoil and overall firing system. The Shadow 2 Orange also comes with a full fiber optic front sight and adjustable rear sight. Like the original Shadow 2, it includes pronounced serrations for easier grip and smoother slide depression. This is a CO2 Blowback airsoft gun that fires 6mm BBs from a 26-round magazine at an average rate of 328 fps (1.0 joule). Combined with the adjustable hop up, this gun provides reliable firepower and flexibility for airsoft shooters. This special edition pistol comes with its own hard case. This sturdy and reliable gun case is perfect for storing, protecting and transporting this valuable airsoft gun. It features a soft foam interior with pre-cut slots for the gun and magazine. This ensures that the valuable contents are protected from all kinds of impacts and stay perfectly in place no matter what. The CZ Shadow 2 Orange is a bold special edition of the beloved original. Delivering superior accuracy, stability and overall quality.

Real history of steel:

The Shadow 2 Orange was designed to be a landmark improvement for competitive shooters, unlike the origins of CZ's 75 series, which was intended more for use by the military and law enforcement. As such, all additional features, improvements and modifications to the real steel gun are aimed at improving competition performance. At the same time, it maintains the standards of quality, handling and performance established by its predecessors. Like its predecessor, the Shadow 2 which has been widely and successfully used among IPSCs in the competitive target shooting world, the Shadow 2 Orange is making big waves in the same competitive arena. The Shadow 2 Orange airsoft is also used among real steel shooters for draw practice due to its hyper realistic craftsmanship. The true Steel version of the Shadow 2 Orange and its airsoft counterpart are currently considered the essential precision instrument for target shooting among the highest competitive ranks of the IPSC and AIPSC.
