### **INFORCE is back with its new generation of weapon-mounted lights.**

An ergonomic, non-slip button, shaped to fit the human thumb, makes the tape switches of older designs obsolete and allows for intuitive activation and deactivation, while a toggle safety prevents the device from being turned on until the user is ready.

Unlike other models that use cheap plastic, Inforce insists on the quality of its products and has constructed the WML White Gen 3 with reinforced nylon, making it impervious to dirt, sand or other solid debris, while also making it waterproof up to 66 feet/20 meters.

This lightweight and durable lamp is a testament to INFORCE's commitment to reliability and quality.
