New generation more powerful with an aluminum head

INFORCE has launched its latest weapon-mounted light, the WMLx White Gen 3, which represents a significant improvement over its predecessor. This version is brighter and more powerful than ever, delivering twice the beam intensity with two 123a batteries, without compromising runtime, which remains at 2 hours.

- 1100 lumens in high mode
- Beam intensity of 25,000 candelas
- Distance of 316 m (1,036.75 ft)
- 2 hours of battery life with 2 CR123A batteries
- ¼ turn of the head engages locking mode for travel, transport and storage
- Safety lever minimizes accidental discharges
- Integrated clamp interfaces with MIL-STD-1913 rails
- No tools are required for installation or disassembly
- The non-slip switch controls constant, momentary, and strobe functions.
- Waterproof up to 20 meters

The WMLx White Gen 3's ergonomic, non-slip button fits the shape of the human thumb, making the switches of older models obsolete. The button allows for intuitive activation and deactivation of the light, while a toggle safety ensures that it cannot be accidentally turned on. INFORCE constructed the WMLx White Gen 3 with reinforced nylon, making it impervious to dirt, sand, and other solid debris. The light is also waterproof up to 20 meters.
