With a beam intensity of 900 lumens and a range of 656ft/200m, the WMLX White/IR Gen 3 offers an infrared mode, when using light intensification equipment.

INFORCE has launched its latest iteration of weapon-mounted lights with the WMLX White/IR Gen 3. The new generation offers greater brightness and power, delivering more than twice the beam intensity of its predecessor with two 123a batteries. The 2-hour battery life remains unchanged, ensuring consistent performance for extended use in the field. This feature, combined with the ergonomic non-slip button, which conforms to the shape of the human thumb, allows users to turn the lamp on and off intuitively and safely. Additionally, a toggle safety prevents the device from being turned on until the user is ready.

- 900 lumens in high mode
- Beam intensity of 10,000 candelas
- Distance of 200 m (656 feet)
- 2 hour battery life with two 123a batteries (1.5 hours in IR mode)
- ¼ turn of the head engages lock mode for travel, transport and storage
- Safety lever minimizes accidental discharge
- Integrated clamp interfaces with MIL-STD-1913 rails
- No tools are required for installation or disassembly
- Anti-slip switch controls constant, momentary and strobe functions.
- Waterproof up to 20 meters

The WMLX White/IR Gen 3 is suitable for low light situations (No light / Low light). Its fiberglass-reinforced nylon construction, which is impervious to dirt, sand, or other debris, sets it apart from other models that may use cheaper plastic. This model is also waterproof up to 20 meters, ensuring reliable performance in all conditions.

This lightweight, durable lamp and its exceptional features demonstrate INFORCE's commitment to quality and reliability. The WMLX White/IR Gen 3 is a valuable addition to any weapon system for anyone who demands premium illumination and performance.
