## High-end Hi-Capa gas blowback airsoft replica: precision, Tokyo Marui compatibility and race finish.

Compact and high-performance **Hi-Capa replica** , designed for the demanding gamer seeking ergonomics and compatibility.

- **Operation** : Gas Blowback (GBB).
- **Hop-Up** : adjustable to optimize range and dispersion.
- **Magazine compatibility** : compatible with Tokyo Marui, WE-Tech and other similar Hi-Capa 5.1 magazines.
- **Inner barrel** : diameter 6.01 mm - internal length 114 mm.
- **Velocity** : 300 - 330 FPS (measured with 0.20g BBs).
- **Capacity** : 28-round magazine.
- **Dimensions & weight** : total length 230 mm - weight 1 KG.
- **Construction** : lightweight CNC aluminum slide + injection polymer frame.
- **Ergonomics** : stippling hand, textured grip, fiber optic sights, integrated magwell.

The LTX6 Knightshade is a Hi-Capa designed for intensive use: balance of weight/strength, optimized grip and wide compatibility of parts.

### Performance and mechanics

With its lightweight CNC-machined aluminum slide mounted on an injection-molded polymer frame, the LTX6 offers an ideal balance between rigidity and lightness. The gas blowback system, combined with the adjustable hop-up, allows for 300-330 FPS (0.20 g) while maintaining realistic recoil. The 6.01 mm, 114 mm long inner barrel promotes a stable trajectory and increased accuracy.

**Ergonomics and handling**

The hand-stitched grip and textured handle ensure superior traction, even in wet conditions. Fiber optic sights facilitate target acquisition, and the integrated magwell speeds up reloading. An ambidextrous safety lever and functional beavertail provide ergonomic control for both right- and left-handed shooters.

**Compatibility and customization**

The LTX6 accepts most Tokyo Marui Hi-Capa parts, and its magazines are compatible with Tokyo Marui, WE-Tech, and other similar 5.1 Hi-Capa magazines, opening up a wide range of internal and external upgrade possibilities (springs, precision barrel, hop-up parts, etc.). The lower Picatinny rail allows for the addition of lights/lasers for CQB operations.

**FAQ**

**Is the replica delivered ready to use?**

The replica is supplied without gas or BBs; you will need to provide GBB compatible gas and BBs for use.

**Which chargers are compatible?**

Magazines compatible with Tokyo Marui, WE-Tech and other similar Hi-Capa 5.1 magazines (check compatibility before purchase).

**Can Tokyo Marui parts be used?**

Yes, the replica is compatible with most Tokyo Marui Hi-Capa parts for internal and external upgrades.

**What are the dimensions and weight?**

Total length 230

mm; weight 1 KG; inner barrel 114 mm (diameter 6.01 mm).
