A61653	SKYWOODS emergency lantern 500 Lumens	Vente libre	4.8	14	190	34.00 € incl. tax

4-in-1 lighting, backup battery and magnetic mount for all outdoor situations.

The **Skywoods L70931** combines a **flashlight** and a **500-lumen lantern** in a compact and robust design. Its various lighting modes, magnetic attachment, and power bank function make it a versatile tool for **camping**, rescue operations, and emergency lighting.

- **Light output:** 500 lumens
- **Lighting functions:** flashlight, lantern, mosquito repellent light, and emergency signaling
- **Lantern lighting:** diffusion up to 360°
- **Protection rating:** IP66
- **Power supply:** integrated Li-ion battery
- **Charging:** USB Type-C port
- **External battery function:** USB output for emergency charging
- **Mounting:** integrated magnet and hanging hook
- **Construction:** shock-resistant and suitable for outdoor activities
- **Weight:** 350 g
- **Comes with** USB-C charging cable and carabiner

A 4-in-1 light for camping and unexpected situations

The **Skywoods L70931** is more than just a **camping lamp**. Its multifunctional lighting system allows you to switch from a directional flashlight to a lantern that diffuses light around its body. Two additional functions complete the package: a **mosquito repellent light** and a signaling mode for emergency situations.

This versatility proves invaluable in the field. To reach your bivouac site, you use the flashlight. Once set up, the lantern mode provides much wider illumination around the table or under the shelter. In case of an emergency, the signaling mode makes it easier to attract attention.

500 lumens and light diffusion up to 360°

With a claimed output of **500 lumens** , this lamp provides suitable lighting for **camping** , maintenance work, nighttime travel, and supplemental lighting. The translucent body is designed to diffuse light over a wide area when used in lantern mode.

It can therefore be used in a tent, around a campsite, in a workshop, a vehicle or at home during a power outage.

Magnetic attachment and hanging hook

Holding a lamp when you need both hands free isn't always easy. That's why the **Skywoods L70931** incorporates a **magnet**, allowing it to be attached to any ferrous metal surface. This is a particularly practical solution for working on a vehicle, DIY projects, or maintenance tasks.

Its **hanging hook** offers a second installation option. The lantern can be hung in a tent, under a shelter, or from any other compatible support to provide overhead lighting.

IP66 protection for outdoor activities

Designed for outdoor use, the lamp has an **IP66 rating** . Its construction limits dust penetration and resists powerful water jets. Its robust casing is also designed to withstand the common stresses encountered during outdoor activities.

Weighing only **350g** , it remains compact enough to easily fit in a hiking bag, camping equipment, vehicle or emergency kit.

An integrated backup external battery

Another useful feature when away from an electrical outlet: the lantern can serve as a **backup power bank** . Its USB output allows you to power or recharge a compatible device, such as a smartphone, when needed.

The internal battery is recharged via its **USB Type-C port** . Lighting and backup power are thus combined in a single, easily portable device.

A useful lamp far beyond camping

Camping, bivouacking, night walks, maintenance, working in dimly lit areas, or power outages: this **rechargeable multi-function lamp** covers a wide range of uses. It's precisely this combination of directional lighting, lantern functionality, magnetic attachment, and backup power that makes it a valuable addition to your outdoor gear or vehicle.

FAQ

What is the power of the Skywoods L70931 lamp?

The **Skywoods L70931** has a claimed luminous output of **500 lumens** . It can function as a flashlight or as a wide-beam lantern.

Can this lantern be used to charge a phone?

Yes. It has an **external battery function** with a USB output allowing for emergency charging of a compatible device, including a smartphone.

Can the lamp be used in the rain?

Its **IP66 rating** indicates protection against dust and heavy water jets, making it suitable for common conditions encountered during outdoor activities.
