- **Loop recording:** can be activated so you don't miss anything
- **2" color screen** + intuitive interface
- **Waterproofing:** IP65 - for outdoor use
- **Power supply:** 8 AA batteries (or solar panel/block - not included)

Sharp images and ultra-high-definition videos

The PIE1076 captures **photos up to 48 MP** and **4K video** with audio. Ideal for wildlife observation or site monitoring, it guarantees stunning detail day and night.

Wide and effective detection

Its **wide-angle (120°) PIR sensor** detects movements up to 20 m. Combined with an **84° field of view** and a **trigger speed of 0.3 seconds** , it captures every movement with responsiveness.

Discreet and efficient infrared flash

Equipped with **34 invisible black LEDs** , the flash automatically adapts to ambient light. Its range is adjustable (short, medium, long) up to **20 m** , without disturbing animals.

3 capture modes + advanced Time Lapse

Single photo (1 to 5 shots), **single video** (5 seconds to 10 minutes), or **photo + video** with each shutter release. **Time-lapse** mode allows you to schedule regular shots, with or without automatic video generation from the photos.

Advanced features and battery life

Time-stamping of photos (time, date, temperature, moon phase, etc.), **programmable device name** , password, and **loop recording** to prevent memory from ever being full. **Powered by 8 AA batteries** (not included), compatible **with an external 6V power supply** .

Easy to install and program

The **2.0" color** screen makes adjustments easy. The **USB Type-C port** allows for fast file transfer to your computer. Compact and IP65 waterproof housing for **year-round outdoor use** .

Box contents

- 1 PIE1076 camera trap
- 1 USB Type-C cable
- 1 fixing strap + wall mounting kit
- 1 quick start guide

FAQ

Can a solar power supply be used with this model?

Yes, the PIE1076 is compatible with an external 6V power supply, including solar panels sold separately.

Does the device record in a loop?

Yes, you can enable the loop recording function to automatically overwrite the oldest files.

How long is a time-lapse video?

The duration of time-lapse videos depends on the number of photos taken at regular intervals and the selected mode. In "Time Lapse + Video" mode, the camera automatically generates a video from the photos.
