Improve your accuracy with the Fiber Optic V-Sights for VMP-2!

V-Sights RIS Fiber Sights are raised front and rear sights, incorporating illuminated fiber optics for optimal visibility.

Designed to fit perfectly on the top rail of the **VMP-2** replica, these sights allow for rapid target acquisition, improving accuracy during engagements.

These Sights mount on Picatinny rail, so they can be installed on a large number of replicas.

Made from durable materials, V-Sights are designed to withstand the rigors of airsoft play while maintaining consistent performance. Installation is quick and easy, securely attaching to the top Picatinny rail of your VMP-2 without the need for additional modifications.

Why Choose V-Sights RIS Fiber Sights Vorsk VMP-2?

- **Rapid Target Acquisition:** Bright fiber optics capture and amplify ambient light, providing clear visibility of aiming points, even in low-light environments.
- **Raised Design:** The increased height of the sights allows for comfortable use with protective masks and facilitates alignment with various optical accessories.
- **Easy Installation:** Attaches directly to the VMP-2 top rail, providing quick setup without specialized tools.

Technical characteristics:

- **Compatibility:** Specifically designed for the Vorsk **VMP-2** .
- **Materials:** Sturdy metal construction with fiber optic inserts.
- **Fiber Color:** Green for optimal visibility.
- **Mounting Type:** Standard Picatinny rail mount.

Benefits :

- **Improved Accuracy:** Allows for more accurate shots through better target acquisition.
- **Durability:** High quality materials ensuring a long service life.
- **Versatility:** Compatible with other rail-mounted accessories, such as scopes or red dot sights.

1. Are these sights compatible with other replicas than the VMP-2?

The **V-Sights RIS Fiber Sights** are specifically designed for the Vorsk **VMP-2** . Their compatibility with other replicas is not guaranteed and depends on the configuration of the top rail of the replica concerned.

2. What color are optical fibers?

V-Sights' fiber optics are typically green in color, providing excellent visibility in a variety of lighting conditions.

3. Does installation require any special tools?

No, V-Sights are easily installed by attaching them to the VMP-2's top Picatinny rail, without the need for specialized tools.

4. Are the sights adjustable?

The available information does not specify whether the V-Sights are adjustable. It is recommended to consult the product manual or the official Vorsk website for specific details on possible adjustments.
