A real defense weapon!

The Beeman BP50 self-defense pistol is designed for maximum personal protection. Powered by CO2, it fires .50 caliber rubber bullets with an energy of up to 15 joules, ensuring a particularly powerful shock effect. It has a very realistic appearance.

- Semi-automatic operation
- 12g CO2 cartridge with emergency percussion
- Non-lethal rubber ammunition

Comes with two 6-shot magazines and one bag of 12 rubber pellets. Requires one 12g CO2 cartridge.

Equipped with a removable 6-round magazine, the Beeman BP 50 allows for instinctive fast reloading for shooters thanks to its magazine contained in the stock and semi-automatic use for increased responsiveness. The rapid CO₂ piercing system, located in the grip, ensures immediate activation in an emergency. A control window allows you to see the number of projectiles remaining, thus avoiding unpleasant surprises. The ambidextrous safety, positioned at thumb level, offers intuitive use for both right- and left-handed users.

Technical information:

- The CO2 cartridge is installed head down in the pistol grip
- The percussion mechanism is entirely metallic and particularly resistant.
- It is possible to fire several magazines (sold as an option) with a 12g CO₂ cartridge.
- The Beeman gun is not compatible with plastic-skirted steel balls.
- Delivered without CO2 sparklets, to be purchased as an option.
