GBB under CANIK license: realistic finish, red dot base and 14 mm threaded barrel.

Gas Blowback replica developed in collaboration with CANIK and Cybergun, faithful in dimensions and feel.

- **Operation** : Gas Blowback (GBB).
- **License** : Official CANIK replica (realistic markings and proportions).
- **Construction** : cylinder head and metal components + polymer/nylon fiber frame.
- **Inner barrel** : 100 mm Ø 6.03 mm — **adjustable hop-up** .
- **Magazine capacity** : 22 BBs.
- **External barrel** : 14 mm CCW threaded (SALIENT ARMS version with SAI markings).
- **Rail** : Lower Picatinny for lamp/laser.
- **Ergonomics** : ambidextrous design (except for magazine ejection), aluminum magwell, rear cocking indicator.

This TP9 Elite Combat version faithfully reproduces the look and feel of the real model, with improvements adapted for airsoft (magwell, optical base, threaded barrel).

Ready for field use after adding gas and BBs, it is aimed at demanding players looking for a realistic and modular base.

Construction and finishing

The replica combines a **metal slide** for a realistic shooting feel with a **fiberglass polymer frame** to keep the weight down. Official markings, a cocking indicator, and a tan/black finish enhance its authenticity. The **aluminum magwell** facilitates reloading and adds a robust touch to the base of the grip.

Performance and mechanics

Operating with **gas blowback**, the TP9 Elite Combat delivers realistic recoil and a smooth cycle. The **100mm (6.03mm) inner barrel**, combined with an **adjustable hop-up**, provides a stable trajectory and accuracy suitable for CQB and medium-range engagements. The **14mm CCW (SALIENT ARMS SAI) threaded outer barrel** allows for the installation of compatible compensators or suppressors.

Ergonomics and compatibility

The grip is optimized by the textured surface and ambidextrous design (magazine release button on the standard side). The **red dot** sight base facilitates the installation of a micro red dot and speeds up the transition from mechanical to electronic sights. The Picatinny rail accepts lights and lasers for CQB.

Interview and recommendations

Regularly lubricate the bolt and seals, check the valve seals, and use a lubricating gas appropriate for the ambient temperature. Clean the inner barrel after intensive use and periodically check the attachment of the scope base and magwell to ensure safety and longevity.

FAQ - Questions/Answers

Is the replica delivered ready to use?

The replica is supplied without gas or BBs; you will need to provide GBB compatible gas and 6mm BBs for operation.

What is the thread type of the barrel and what accessories can be mounted?

The outer barrel is threaded **14 mm CCW (SALIENT ARMS)**; it accepts 14 mm CCW compatible compensators and silencers (check no adapter depending on the accessory).

What type of sight can be mounted on the base?

The base is designed for the installation of a micro red dot; check the footprint and center distance of the desired model before purchase.

What is the charger's capacity and compatibility?

22 BB magazine supplied; the replica uses its dedicated magazine (check compatibility before using other brands).
