The famous EG detonating sticks now sold individually

The MK5 Thunderflash is the benchmark product for distraction and diversion. Airsoft and Paintball players use this product to divert their opponents attention when they can't get an aim on them, a simple but very effective product designed to mimic the version used by the military.

- Fuse Delay: Approx 4-6 seconds
- Effect: Loud Noise Report
- Effect Duration: Instant
- Effect Payload: fragmentation of cardboard tube
- Ignition Type: Friction
- Composition: Weight 0.5 grams
- Size: 20mm diameter x 195mm high
- Boxed Qty: 200 (2 x 100 inner boxes)
- Water Resistant Outer: No
- Noise Level: Max 120db @ 10M
- CE Classification P1

The effect of this baton is sonic. It emits a crazy sound (120db at 10 meters). It is activated by friction. Simply unpin the cap of the dough, turn this cap over and rub it on the head of the baton. The latter will ignite and trigger the firing mechanism a few seconds later. It is therefore imperative to throw in a safe place and release the detonating baton immediately after it ignites.

- Trigger: 4 to 6 seconds after ignition
- Effect: loud sound
- Sound duration: immediate (boom)
- Ignition type: friction
- Diameter 20mm
- Height 195mm

- CE P1 classification
