The essential Ultrair gas now in high power for winter games

Description:

This 178 psi* Airsoft Power Gas Ultrair Red Gas is a high performance gas, formulated to maintain the performance and autonomy of your replicas when temperatures are low.

Tested at a base temperature of 25°C

This gas is not recommended for use in a plastic-breech pistol, as the pressure at room temperature is higher than it is designed for. To help you choose the right gas for your gun, this product has also been tested at 5°C, 10°C, 15°C, 20°C, and 30°C, as shown in the handy temperature and pressure range chart on the back of the cylinder.

*Tested at 25°C/77°F

Features:

- 570 ml bottle
- High power gas 178 psi*
- Recommended for winter use
- Durable metal nozzle

Remember to use your equipment responsibly and consider the limitations of your weapons and magazines. To help you choose the right gas for your equipment, this gas has been tested over a wider temperature range, as indicated in the handy temperature and pressure range chart on the back of the product.
