#### ■ Production authorized under full license

The VFC SI SMP gas pistol is manufactured under the authorization of EMG & Strike Industries, with fully approved markings. All product shapes and specifications are detailed.

#### ■ Mount compatible with Micro Red Dot sights

The integrated steel mounting plate improves durability and is designed to fit SIG ROMEO Zero red dot sights (or other red dot sights with the same mounting footprint).

#### ■ Strong and durable steel parts

The use of steel parts for the assembly of the operating mechanism and hammer not only ensures durability but also provides a smooth feel that other brands cannot match.

#### ■ Wide cylinder design

The SI SMP is extremely compact, yet it uses an enlarged-diameter cylinder system for the bolt cycle. Even with a red dot sight installed, it remains reliable for shooting.

#### ■ High capacity ball magazine

Compared to other GBB pistols of the same size, the SI SMP offers a 20-round capacity, similar to that of the gas-operated GLOCK pistol. With a BB in the hop-up chamber, the total capacity increases to 21 rounds.
