- **Compatibility** : standard Tokyo Marui Hi-Capa parts and magazines.
- **Ejection** : ambidextrous.

Arcturus, known for its high-end AEGs, has created an exceptional GBB with the Vanguard 5.1", a replica designed for precision and reliability in all circumstances.

Its solid design, mechanical realism and Hi-Capa compatibility make it a top choice for experienced players and competitors alike.

Construction and performance

The **Arcturus Vanguard 5.1"** GBB pistol features a **CNC-machined aluminum slide** that delivers crisp recoil and a smooth cycle. **Internal MIM steel components** ensure exceptional wear resistance. The **6.03 mm EnduraHeat ENT barrel** optimizes trajectory and shot stability, while the **adjustable hop-up** allows for precise tuning depending on the BB being used.

Ergonomics and shooting comfort

The textured **nylon-fiber polymer** grip ensures a firm and comfortable hold, even during long sessions. The ambidextrous magazine release makes it easy to use for all types of players. **Fiber optic sights** guarantee rapid target acquisition, even in low light, and the integrated Picatinny rail allows for easy attachment of a light or laser.

Compatibility and customization

The replica is fully compatible with the majority of **Tokyo Marui Hi-Capa parts** : magazines, barrels, springs, valves, triggers, etc. This modularity allows for easy maintenance and advanced customization according to the player's needs or the constraints of competition.

Maintenance and durability

To maintain performance, regularly lubricate the bolt and valve, clean the barrel, and use a gas appropriate for the temperature. Regular maintenance of the seals will extend the life of the GBB while maintaining consistent firing.

FAQ - Questions/Answers

Is the replica ready to use?

Yes, the replica comes ready to use. You just need to add gas and BBs to get it working.

Is the Vanguard 5.1" compatible with Tokyo Marui Hi-Capa magazines?

Yes, it is compatible with standard Tokyo Marui Hi-Capa magazines and parts.

What is the accuracy of the internal barrel?

The 6.03 mm ENT barrel offers excellent trajectory stability and increased accuracy at medium range.

Is the gun ambidextrous?

Yes, the magazine ejection control is ambidextrous, making the replica usable by both right- and left-handed users.

What are some maintenance tips?

Clean and lubricate the cylinder head, nozzle and valve regularly; use a suitable gas and check the seals to maintain optimal performance.
