High-performance Hi-Capa airsoft pistol supplied with ARS1 micro red dot sight.

The **ARCTURUS Hi-Capa 5.1 Vanguard GBB** is a **gas-powered airsoft pistol** designed for precision, reliability, and advanced customization. Supplied with an **ARS1 micro red dot sight** , it combines modern performance with maximum compatibility with standard Hi-Capa parts.

- **Type:** GBB (Gas Blowback) airsoft gun
- **Platform:** Hi-Capa 5.1
- **Optics: ARS1** micro red dot included
- **Bolt:** Metal with fiber optic sights
- **Compatibility:** Highly compatible platform for Hi-Capa parts
- **Structure:** 10 internal **MIM** steel parts
- **Control:** Ambidextrous magazine release
- **Handle:** Textured reinforced nylon fiber
- **Length:** 22 cm
- **Barrel length:** 11.3 cm
- **Weight:** 965 g (990 g with red dot sight)

A Hi-Capa platform designed for performance

The **ARCTURUS Hi-Capa 5.1 Vanguard GBB** is based on one of the most popular **airsoft** platforms. Designed to offer an excellent balance of accuracy, responsiveness, and reliability, this model benefits from an optimized internal design to improve air efficiency and ensure consistent performance shot after shot.

ARS1 red dot mounted directly on the cylinder head

This version comes with an **ARS1 micro red dot sight.** The mount allows for a lower aiming axis and faster target acquisition. This configuration also enables natural co-witness with the integrated **fiber optic sights** .

Robust and durable internal design

The replica incorporates **ten internal parts made of MIM (Metal Injection Molding) steel,** guaranteeing long-term strength and reliability. This construction reinforces the elements subjected to mechanical stress during the **gas blowback** cycle, ensuring consistent and durable operation.

Maximum compatibility for upgrades

The **Hi-Capa Vanguard** was designed to offer **high compatibility with standard Hi-Capa parts** . Players wishing to upgrade or customize their replica can easily install common aftermarket parts: trigger, inner barrel, hop-up, or external parts.

Optimized ergonomics and control

The molded grip, made of **reinforced nylon fiber,** features a dotted texture that enhances grip and control of the replica. The **ambidextrous magazine release button** allows for comfortable operation for both right- and left-handed players.

Reinforced charger and durable components

The magazine components - feed lips, follower, and base plate - are made of **SEFP (Super Enhanced Formulated Polymer)** . This specially formulated material offers high impact resistance and improves durability during intensive field use.

- **Platform:** Customizable Hi-Capa 5.1
- **Optics:** ARS1 micro red dot included
- **Cylinder head:** Metal optics ready
- **Technology:** Realistic Gas Blowback System
- **Materials:** MIM steel and SEFP polymer

FAQ
