GBB airsoft licensed by Polymer80/Double Eagle: modern look, wide compatibility and realistic shooting.

The **P80 PFS9** by **Double Eagle** , licensed by **Polymer80,** combines a **CNC-machined aluminum slide** and a lightweight **polymer frame** for strength and ergonomics. RMR-ready, with an integrated Picatinny rail and Hi-Capa compatibility, this pistol is a modular choice for demanding players.

- **Brand:** JDG Polymer80 (licensed) / Double Eagle
- **Type:** GBB Pistol (Gas Blowback)
- **RMR:** cutout for red dot sight + protective plate included
- **Construction:** polymer frame + CNC machined aluminum slide
- **Inner barrel:** Ø 6.01 mm - internal length 90 mm
- **Magazine capacity:** 30 rounds
- **Compatibility:** Compatible with Glock magazines
- **Ergonomics:** pronounced stippling grip, slide grooves for easy reloading
- **Accessories:** Integrated Picatinny rail for lamp/laser
- **Dimensions:** length 186 mm - weight 800 g
- **Colors:** Black or Black & Tan

The **P80 PFS9** meets the expectations of enthusiasts who want a pistol that is both aesthetically pleasing and adaptable. Its CNC-machined aluminum slide and RMR-ready cutout facilitate the integration of a red dot sight while maintaining a clean profile.

The polymer frame/aluminum slide combination provides a good balance between lightness and robustness. Compatibility with **Hi-Capa magazines** and standard parts allows for seamless upgrades and maintenance.

Design and construction

The **CNC-machined slide** ensures a precise feel and enhanced durability. Reloading aid grooves and an RMR plate maintain the aesthetics while providing functionality. The polymer frame, textured with pronounced stippling, guarantees a firm grip even in demanding conditions.

Performance and compatibility

Equipped with a **6.01 mm (90 mm) inner barrel** , the PFS9 offers a stable trajectory and accuracy suited to medium range. The gas blowback system with reinforced valves provides realistic mechanical recoil and a usable rate of fire, while the 30-round magazine minimizes interruptions during gameplay.

Ergonomics and usage

At 186 mm long and weighing 800 g, the pistol remains easy to handle while conveying a convincing sense of weight. The Picatinny rail allows for the addition of tactical equipment (light, laser) for CQB and nighttime scenarios.

FAQ

Is the replica delivered ready to use?
The replica is delivered without gas or BBs. You will need to purchase GBB-compatible gas and quality BBs for testing and break-in.

What type of sight can be mounted on the RMR cutout?
The cutout accepts most small red dots of RMR format; check the dimensional compatibility of the chosen viewfinder.

Which magazines are compatible?
The supplied magazine is a 30-round model; the replica also accepts some similar Hi-Capa / Tokyo Marui magazines - check the reference before purchase.

Can the slide or the inner barrel be upgraded?
Yes, the aluminum slide and the Ø 6.01 mm inner barrel are compatible with many aftermarket parts intended for P80/Hi-Capa platforms.
