Perfect balance between realism and versatility - a GBB designed for training and the field.

The ATP 02 Golden Eagle is a **Gas Blowback (GBB)** replica designed for players looking for a reliable, ergonomic, and gear-ready secondary weapon.

- **Operation:** Gas Blowback (GBB)
- **Cylinder head:** grooved and perforated metal
- **Frame:** high-strength polymer
- **Length:** 210 mm
- **Weight:** approximately 730 g
- **Magazine:** metal, 25 rounds
- **Accessories:** lower rail for light/laser, RMR-ready plate, fiber optic sight
- **Ergonomics:** interchangeable eject button (suitable for left-handed users)
- **Included:** carrying case, speedloader, cleaning rod

The ATP 02 Golden Eagle is aimed at players who want a complete GBB replica, reliable right out of the box and easy to adapt depending on the role on the field.

Its slightly longer profile than the ATP 03 gives it increased stability and optimized handling for aligning sights and mounting accessories.

Detailed description and key features

The pistol features a **gas blowback system** that provides realistic recoil and a faithful semi-automatic cycle. The **serrated and skeletonized metal slide** contributes to its tactical aesthetic.

The **polymer frame** reduces weight without sacrificing robustness: the replica weighs approximately **730g** , a good compromise for extended wear. The **25-round metal magazine**

maintains balance and responsiveness during matches.

Practical in the field, the replica features a **lower rail** for lights/lasers and an **RMR plate** ready to accept a compact optic. **Fiber optic sights** improve acquisition speed in various conditions, and the **interchangeable ejection button** facilitates adaptation for left-handed users.

Maintenance and compatibility

Routine maintenance involves checking the magazine seals, nozzle lips, and applying silicone lubrication to moving parts-simple operations that ensure consistent performance. The replica is compatible with compact RMR optics and accessories mounted on a 20mm rail.

FAQ - Frequently Asked Questions

Is the replica ready to use right out of the box?

Yes - comes in a case with speedloader and cleaning rod; provide compatible gas and silicone oil for seals.

Can an RMR optic be mounted without modification?

Yes - the plate is designed for a compact RMR; check the alignment and tighten the fixings properly after assembly.

Is it suitable for CQB and outdoor use?

Yes - length 210 mm and weight approximately 730 g offer versatility: maneuverability in CQB and stability outdoors.

What kind of maintenance is required for a GBB like this one?

Regular maintenance of magazine seals, silicone lubrication of moving parts and visual inspection of the breech and nozzle.

Is the pistol suitable for left-handed people?

The eject button is interchangeable to facilitate use by left-handed people; other controls remain ambidextrous depending on the model.
