MAGNUS PRO PRECISION TDC Hop-up unit for HI CAPA TOKYO MARUI (TM)

Made from durable, precision-machined aluminum, the Magnus Pro Hop-Up chamber features true vertical TDC (Top-Dead-Center) movement. This means that regardless of your hop-up setting, the pressure point remains in the same position for consistent results.

The revolutionary self-centering tri-lug locking system is the most effective design, not only for centering the inner barrel but also for holding it firmly in place!

The CNC adjustment sleeve precisely centers the orientation of the hop-up seals and holds it in place for lasting accuracy.

The adjustment wheel is easily accessible via the ejection port and can be adjusted with any pointed tool without the need for disassembly, allowing for simple and precise hop-up adjustment.
