Ready-to-use V2 gearbox with integrated ETU and 8mm ball bearings.

The complete **Lancer Tactical V2 gearbox** is equipped with a **protective ETU** , **8mm ball bearings** and a reinforced design to offer reliability and responsiveness to your M4/M16 type airsoft replicas.

- **Type:** Complete electric gearbox
- **Compatibility:** Standard M4/M16 AEG replicas
- **Materials:** Metal shell, polycarbonate nozzle
- **Recommended battery:** 9.6V NiMH nunchuck type
- **Battery connector:** Tamiya
- **Bearings: 8 mm steel**
- **Spring replacement: Integrated quick system**
- **Image for illustrative purposes only**

A ready-to-use, high-performance gearbox

Designed for M4/M16 AEG replicas, this **complete V2 gearbox** from **Lancer Tactical** stands out for its robustness and ease of installation. Delivered pre-assembled, it allows for a direct replacement, ideal for players looking to upgrade their replica or start fresh with a reliable base.

8mm bearings for smooth transmission

The choice of **8mm steel bearings** significantly reduces friction within the gearbox. The result: less wear, improved responsiveness, and a more consistent rate of fire. This type of bearing is often reserved for higher-end builds.

Integrated protective ETU

This gearbox is equipped with an **Electronic Trigger Unit** that protects electrical components from power surges while improving trigger response time. The trigger pull is crisp, fast, and lag-free, providing a real advantage in the field.

Simplified spring replacement

Thanks to a **quick-release spring guide** , the user can easily adjust the power of their replica according to the terrain or regulations. No complete disassembly is required, which simplifies maintenance and adjustments.

Reinforced internal design

The gearbox includes a **reinforced, full-tooth piston** and a **polycarbonate nozzle** for increased durability. The full-metal shell ensures good absorption of mechanical stress, even in high-speed or high-torque configurations.

FAQ

Is this gearbox compatible with all M4 replicas?

Yes, it is compatible with most M4/M16 replicas using a standard version 2 gearbox.

Does the ETU need to be soldered or is it already wired?

No, the ETU is integrated and ready to use. No additional wiring is required.
