Realistic and efficient metal magazine for MWS GBB platforms.

The **Vorsk Airsoft VMAR Series** is a gas magazine designed for MWS replicas, offering realistic balance and optimized efficiency for modern GBB play.

- **Type:** GBB gas magazine
- **Capacity:** 25 marbles
- **Material:** Metal body (bent steel)
- **Compatibility:** Compatible with MWS replicas
- **Gas autonomy:** Approximately 65 shots per refill
- **Weight:** 493 g

A magazine designed for realistic GBB gameplay

Designed for MWS replica users, this gas magazine takes a pragmatic approach. It features a realistic weight, natural balance within the replica, and a capacity deliberately faithful to real-world standards. In practice, this encourages tactical magazine management and enhances immersion in the field.

Steel structure and authentic sensations

The folded steel outer body, combined with an all-metal internal structure, provides an immediate feeling of solidity in the hand. This choice of materials ensures not only a consistent weight but also excellent resistance to intensive use, including repeated handling during gameplay.

Gas efficiency and long-term reliability

The deliberately simplified internal design reduces unnecessary mechanical interactions. The result: improved operational consistency, optimized gas efficiency, and fewer potential weak points. The magazine is capable of delivering approximately 65 shots per fill under standard conditions, which is particularly valuable in games.

Accessible maintenance and proven compatibility

This model uses a common inlet valve for the **VORSK VMP** and **Hi-Capa** series, as well as a VMP-specific outlet valve. This design simplifies maintenance and parts availability, a real advantage for regular users of GBB platforms.

- **Inlet valve:** VORSK compatible VMP / Hi-Capa

- **Outlet valve:** VORSK VMP
- **Internal architecture:** Simplified, reliability-oriented
- **Positioning:** MWS charger accessible for multiple loadouts

FAQ

Is this charger compatible with all MWS replicas?

Yes, it is designed to be compatible with MWS platforms and compatible MWS replicas on the market.

How much autonomy can be expected per gas refill?

Under standard conditions, this magazine allows approximately 65 shots per gas fill.

Is this charger easy to maintain?

Yes, its simplified internal design and the use of common VORSK valves greatly facilitate servicing and maintenance.
