- **Outer material:** HIPS polymer
- **Internal structure:** Steel
- **Weight:** 570 g
- **Colors:** Black, Tan, Gray

A realistic capacity designed for the MWS

Designed for **MWS gas blowback** platforms, this magazine has a **40-round capacity** , respecting the GBBR design. It promotes consistent reloading while minimizing interruptions during gameplay.

Gas efficiency and streamlined design

The simplified internal design reduces energy losses and improves gas utilization. In practice, this allows for **up to approximately 100 balls per fill** under standard conditions, while maintaining a consistent and reliable cycle.

Steel structure and HIPS polymer envelope

The **VMAR Series 40R** features an **all-steel internal structure,** ensuring realistic weight and believable handling. The **HIPS polymer** outer shell provides robustness and durability, with a controlled weight of 570g.

Valve compatibility and easy maintenance

This loader uses a **VORSK inlet valve** common to the **VMP** and **Hi-Capa** series, combined with a **VORSK VMP outlet valve** . This logical choice simplifies maintenance and management of a fleet of similar loaders.

A pragmatic choice for equipping yourself with GBBRs

Positioned competitively, the **VMAR 40R** makes it easier to assemble a complete set of MWS magazines. It supports realistic, smooth, and durable GBBR gameplay without unnecessary complexity.
